

BIOPHARMA SUMMIT

Shaping the future together

DUBLIN

National institute for bioprocessing
research & training

REGISTRATION

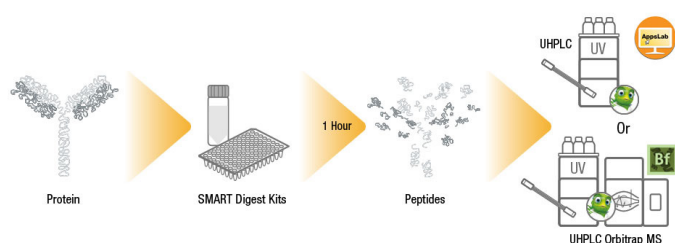

18th October

BioPharma Characterization Summit
thermofisher.com/BioPharmaSummit

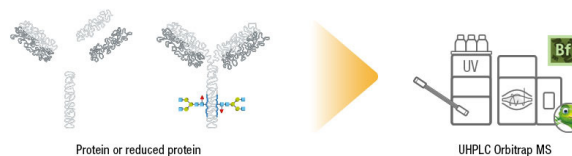

19th October

BioPharma Characterization Workshop
thermofisher.com/uk-ireland-events

We invite you to join us to network and collaborate on the evolving challenges of Biopharmaceutical characterization

This extended Summit event will include an optional full day workshop (separate registration required) with real laboratory experiments conducted and analyzed on the day

Comprehensive peptide mapping and intact protein analysis workflow solutions will be demonstrated

Who should attend?

- Scientists and laboratory managers working in bio/pharma discovery, development, CMC and QC
- Contract testing and manufacturing organizations offering services to pharma and biopharma industry

Why should I attend?

- Maintain your knowledge to stay competitive in the rapidly evolving marketplace
- Be the first to learn about technology at the forefront of pharmaceutical analysis

Featured Analysis:

- Peptide mapping based analysis for host cell protein and multi-attribute monitoring
- Intact mass analysis of mAb glycosylation and ADCs

Featured Thermo Scientific™ Products:

KingFisher™ Duo Prime purification system

SMART Digest™ Kits

Acclaim™ 120 C18 columns

MABPac™ RP columns

MSPac™ DS-10 Desalter Cartridge

Vanquish™ UHPLC systems

Q Exactive™ BioPharma platform

BioPharma Finder™ integrated software
